HomeThink-Twitte-ToDo

When project management software is used properly, it can help
you deliver your projects on-time with a minimum amount of
emotional scars

Projects

Project is a collection of tasks. Your team could use a project to coordinate the development of a product, track a project, and more, depending on your requirements. A project can also be configured to suit the needs of you and your team.

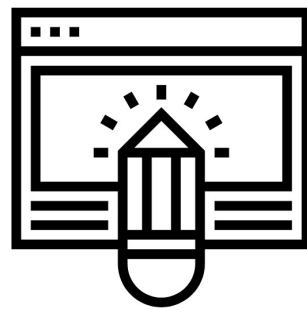

Bring to me

Team

Teams are the champions for engage practices. Team members have different skill sets and cross-train each other so no one person becomes a bottleneck in the delivery of work. Strong teams approach their project with a clear "we" attitude.

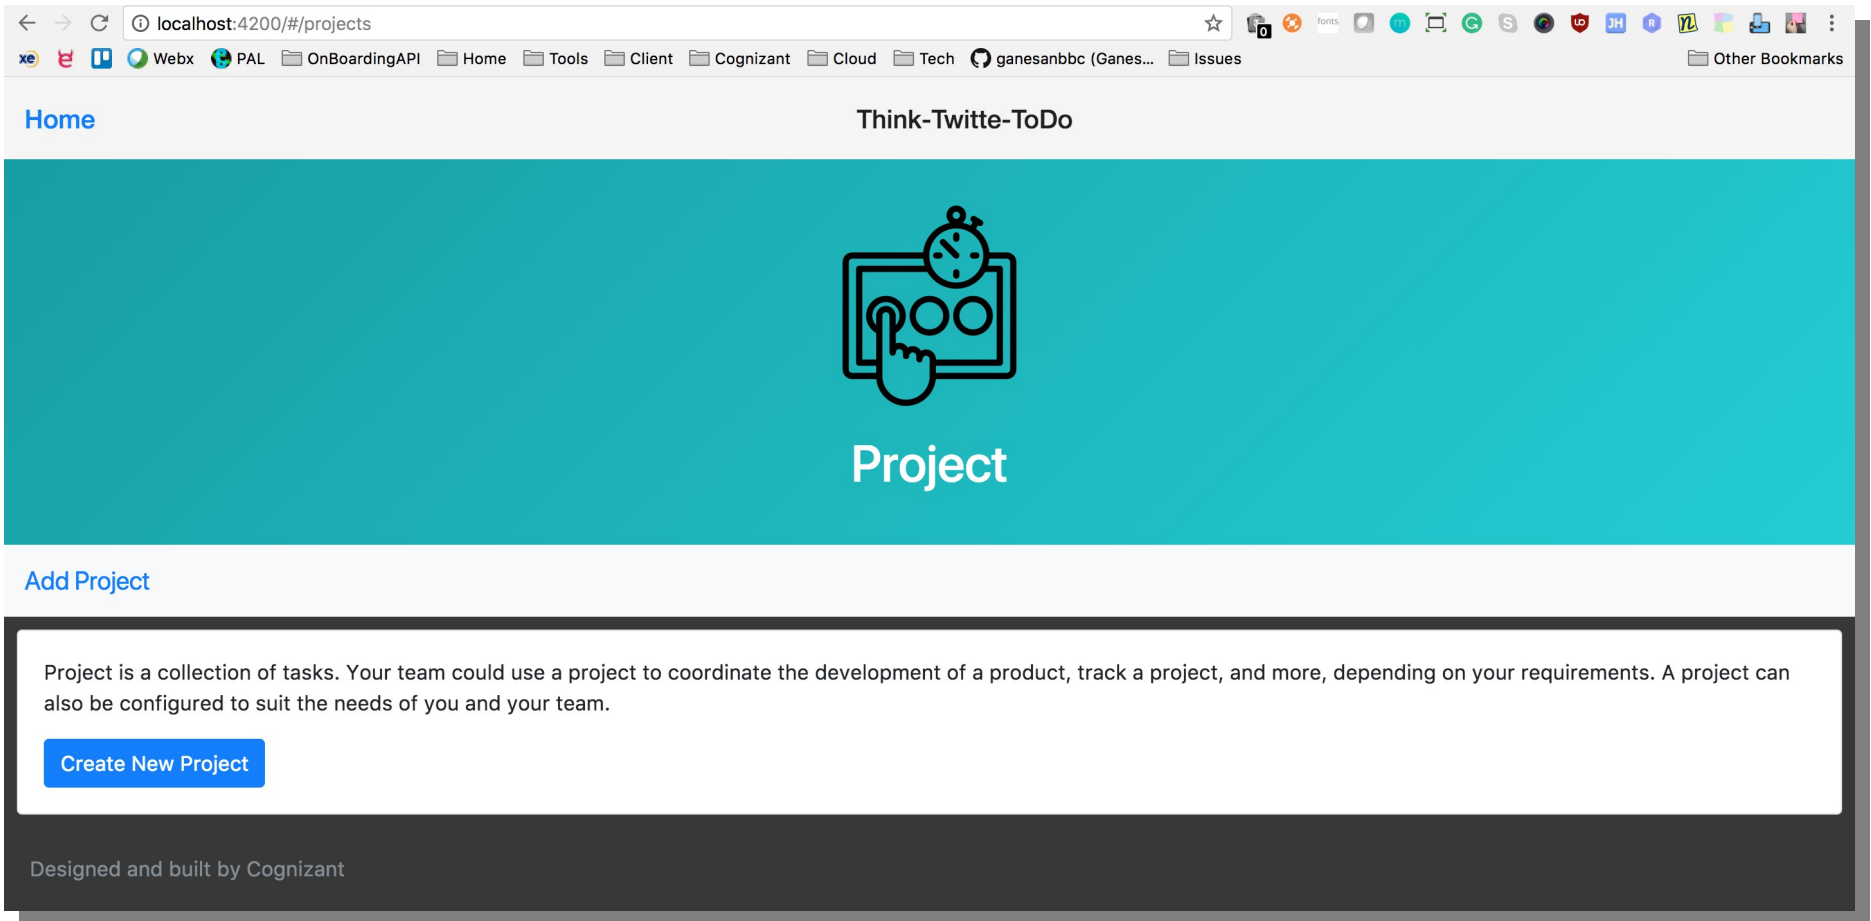

Build my team

Tasks

A task is a unit of work contained within a story. All members of the team can twitte the task and product owner align the task as per the business need. Developer can self assign the task and change the state of the task. Product owner can track all task.

Show tasks

A screenshot of a web browser displaying a form titled "Think-Twitte-ToDo". The browser's address bar shows "localhost:4200/#/projects/0". The form is set against a light gray background and contains the following elements:

- Project Name:** A text input field containing "FSD_Project Management".
- Start Date:** A date input field containing "2018-01-03", accompanied by a calendar icon.
- End Date:** A date input field containing "2018-01-13", accompanied by a calendar icon.
- Priority:** A text input field containing the number "8". Below this field is a hint text: "[XS-1, S-2 & 3, M-5,L-8 ,XL-~]".
- Manager ID:** A text input field containing the name "Amit".
- Submit:** A blue button with white text labeled "Submit".

At the bottom left of the page, there is a footer text: "Designed and built by Cognizant".
